

:ANAPURNA SOLUTIONS

Personalized object printing

Application description

Small objects can be printed in small quantities and personalized. Key for success is to drastically raise productivity by using a mould. In this case we used a mould for DVD's, CD's to distribute annual results, artist portfolio, demo audio CD's, ...

Technology used

- Printed on :Anapurna M - Q8P.
- To be in line with promotional matter printed in offset, the Basic Gamut configurations are used to print towards the ISO standards from offset and silk screen printing.
- Color Profiles are made with ColorTune 5.0 to get smooth and colorful results.

Production notes

- Printed BI-directional with 100% UV power.
- Normal speed (S7), 6m²/hour.
- Mould is used to print 20 items in 1 run.
- Material: DVD, White top layer.

Remarks

- Competition is desktop printer -> this can never be the main business but a mould can be made for any small object.
